Re: Acceptance of Notice of Intention to Commence Small Mining Operations, Ultradent Project,
S/045/057, Tooele County, Utah

Dear Mr. Chatwin:

Thank you for your \$100.00 permit application fee which was received by the Division on June 5, 2001. The application for the proposed Ultradent / O C Claims Project, located in the NE1/4 and the NW1/4 of Section 5, T10S, R12W, SLBM, Tooele County, Utah *is now considered complete and in effect*. No additional information is required by the Division at this time. *You may now commence operations as outlined in your notice, provided you have obtained written approval from the BLM to proceed on federal managed lands.*

The Utah Mined Land Reclamation Act of 1975 [40-8-7(I)] provides the authority for fee implementation which was approved by the Utah Legislature at its 1998 session. Commencing July 1, 1998, the fees are assessed to new and existing notices of intention, and annually thereafter. Small Mining Notices require a \$100.00 annual fee. Because your fee payment was received within 45 days of the next billing cycle, the fee payment will be applied to the next fiscal year (2001-2002). You should not receive a billing statement; however, if you do, please contact Joelle Burns at 538-5291, so it can be corrected.

In accordance with rule R647-3-105 regarding the project location, the areas to be disturbed should be plotted on a map in sufficient detail so that they can be located on the ground. It is also required that the operator mark the proposed (5 acre or less) disturbed area boundary (including access/haul roads) in the field with metal T-Posts (or with some other marker of equal effectiveness). Markers must be appropriately spaced so that the next marker in either direction is clearly visible with the naked eye.

If you wish to expand your operation beyond the five (5) acre limitation, please notify our office as soon as possible to discuss the necessary permitting requirements. Approval of a large mining notice could take from six to twelve months or longer.

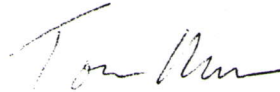

For your reference, I have enclosed copies of our summarized rules regarding "Operation and Reclamation Practices," and the statutory penalty for failure to reclaim a minesite (SMO-1). Please give special consideration to item #10 of the "Operation and Reclamation Practices. Stockpiling topsoil material prior to beginning your mining operation will help ensure successful revegetation efforts upon final reclamation of the minesite. If the area

being mined is a solid rock outcrop, or if the land surface is very rocky, then soil stockpiling is probably not possible. However, even the first few inches of undeveloped material is worth saving to aid in later revegetation efforts, and future regulatory release from reclamation requirements.

Thank you for your cooperation. When in the area, a member of the Division staff will examine the site. Best wishes with your mining operation.

Sincerely,

A handwritten signature in dark ink, appearing to read "Tom Munson". The signature is fluid and cursive, with the first name "Tom" and last name "Munson" clearly distinguishable.

Tom Munson
Senior Reclamation Specialist
